DETAILED ACTION

Claims 1-9 are presented for examination.

Acknowledgement is made of Applicant's claims for benefit under 35 U.S.C. 119(c) to U.S. Provisional Patent Application No. 60/401,390, filed August 5, 2002.

Applicant's Information Disclosure Statement (IDS) filed October 9, 2003 has been received and entered into the present application. As reflected by the attached, completed copies of form PTO-1449 (two pages total), the Examiner has considered the cited references.

Applicant's response filed January 30, 2008 to the requirement for restriction/election dated January 15, 2008 has been received and entered into the present application. Pursuant to the notice dated April 17, 2008, Applicant's response dated January 30, 2008 was non-compliant. Applicant's response filed July 2, 2008 correcting the deficiencies set forth in the notice dated April 17, 2008 has been received and entered into the present application.

Requirement for Restriction/Election

Applicant's election without traverse of the invention of Group I (claims 1-7), directed to compounds of formula (I) or a stereoisomer or pharmaceutically acceptable salt thereof and a pharmaceutical composition thereof, and election of species of the compound (2S)-2-(3(S)-acetylamino-3-((S)-sec-butyl)-2-oxo-pyrrolidin-1-yl)-N-[(1S,2R)-1-(3,5-difluoro-benzyl)-2-hydroxy-3-(3-methoxy-benzylamino)-propyl]-4-phenyl-butyramide of the structure:

for examination on the merits, in the reply filed

Art Unit: 1614

July 2, 2008, is acknowledged by the Examiner.

Examination of the Instant Claims

Search and examination of the instant claims was performed insofar as the instant claims read upon the elected species of (2S)-2-(3(S)-acetylamino-3-((S)-sec-butyl)-2-oxo-pyrrolidin-1-yl)-N-[(1S,2R)-1-(3,5-difluoro-benzyl)-2-hydroxy-3-(3-methoxy-benzylamino)-propyl]-4-phenyl-butamide

with the chemical structure of _____ as set forth in the reply filed July 2, 2008. A reasonable and comprehensive search determined that the prior art at the time of the invention was such that it did not anticipate or render obvious the elected specie of (2S)-2-(3(S)-acetylamino-3-((S)-sec-butyl)-2-oxo-pyrrolidin-1-yl)-N-[(1S,2R)-1-(3,5-difluoro-benzyl)-2-hydroxy-3-(3-methoxy-benzylamino)-propyl]-4-phenyl-butamide.

Accordingly, search and examination was expanded to cover the full scope of compounds instantly claimed and it was again determined that the prior art at the time of the invention was such that it did not anticipate or render obvious the genus of compounds instantly claimed. As a result, Applicant's product claims (i.e., claims to compounds and pharmaceutical compositions thereof) appear, at this time, to be in condition for allowance. In accordance with the rejoinder practice described at page 7 of the Office Action dated January 15, 2008, Applicant's instant claims 8-9, directed to a method of using the compounds of instant claim 1, have been rejoined with claims 1-7 due to the fact that they are strictly commensurate in scope with the compounds that have been determined to be allowable. Claims 1-9 are under examination and are in condition for allowance at this time.

EX PARTE QUALYE ACTION

This application is in condition for allowance at this time except for the following formal matters:

Objections to the Specification

(1) This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). *See e.g.*, p.128, 1.2-3 and 12 and p.131, 1.5 and 57 of the specification. However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825, because it lacks any submission of a computer readable form sequence listing, a paper copy for the specification, a statements under 37 CFR §§ 1.821(f) and (g), and SEQ ID Nos. cited along with each sequence in the specification or figures.

Applicant is reminded that SEQ ID Nos. are not required in figures, *per se*. However, the corresponding SEQ ID Nos. are required in the Brief Description of the Drawings section in the specification. Applicant is also reminded that a CD-ROM sequence listing submission may replace the paper and computer readable form sequence listing copies.

The paper or compact disc copy of the Sequence Listing is an integral part of the application. If submitted on paper, the Sequence Listing must begin on a new page, should appear at the end of the application, and preferably should be numbered independently of the numbering of the remainder of the application. The new page that begins the "Sequence Listing" should be entitled "Sequence Listing." If not submitted as such at filing, the Sequence Listing must be inserted into the application *via* amendment, *e.g.*, by preliminary amendment. If submitted on compact disc, the specification must contain an incorporation by reference of the material on the compact disc in a separate paragraph, identifying each compact disc.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire TWO (2) MONTHS from the mailing date of this letter.
